

## Press Release:

### **Call Gatliff for your next Home Renovation Project**

For the past ten years, Gatliff Custom Builders has earned a well deserved reputation in the custom home building business. Randy Gatliff, Owner and President states that his company has received numerous calls over the years asking if they would consider doing a home addition or makeover project specifically because of the appreciation people have for the quality and presence of their homes. As a result, in addition to building their beautiful homes, Gatliff has performed quite a few kitchen renovations, basement finishes including state of the art theater rooms and additions.

In addition to the quality, Gatliff's homes are recognized for their extraordinary function, interior design, fixture selections and colors. Having this level of interior design expertise available in-house without the extra cost allows Gatliff an added advantage over the typical home improvement contractor. Also part of the Gatliff package is their relationship with Stone Barn Furnishings located in Mt. Hope in the heart of Amish country. Here Gatliff's customers have the assistance of designers with the expertise of furniture and decor layouts and benefit with special pricing arrangements for Gatliff's clientele.

A large part of this company's success can be contributed to their philosophy of partnerships. You see, Gatliff firmly believes to sticking with what works. By this we mean they use the same craftsman to do every project. This ensures a level of quality and consistency not commonly found in today's construction standards. Secondly, no corners are cut when it comes to the quality materials that are incorporated into their projects.

Whether your remodeling needs are large or small, Gatliff Custom Builders can take them from design to completion. Their services include architectural and interior design and the construction expertise for any interior and exterior residential or commercial project. Please contact Randy or Tracy Gatliff for your next construction project at 330-335-5262 or visit their website at [www.gatliffcustombuilders.com](http://www.gatliffcustombuilders.com)

*Thank you!*
